2012 Russound & AirGo Product Catalog

Hello from Russound!

The industry landscape is evolving at a record pace and it is the goal of Russound FMP to provide the right solution at the right price. This includes our whole-house control solutions from Colorado vNet, multiroom audio and video products from Russound, and our outdoor audio system from AirGo - our newest solution!

AirGo is the first portable, weather-resistant, amplified speaker dock for use with the Apple® AirPort Express®. You can use it outside on a deck, on a lawn, in the driveway or anywhere a listener wants to hear great sounding music. With the AirPort Express and AirPlay®, you can play your music directly from your iPhone®, iPad®, iPod touch®, Mac® or PC.

Two other exciting new products are the My Russound iPad App and our Bluetooth receiver. We're always striving for ways that allow users to connect with their experience and putting control in their hands with the My Russound iPad App does just that. Our new Bluetooth capabilities enable systems to receive streaming content from a Bluetooth-enabled device and incorporate the source into a multiroom audio system.

This is an exciting time for Russound as the new home and custom markets are adapting to the new economy. Our primary focus is to deliver solutions that fit this evolving landscape. From speakers to amplifiers, volume controls to IR and our award-winning line of multiroom controllers, you'll find that we offer the most balanced line of solutions.

If you have any comments or questions, please feel free to give us a call.

Sincerely,

Charlie Porritt
CEO, Russound

AirGo Outdoor — The First of Its Kind...

fun to the next level

The AirGo Outdoor is easy and fun to use. With the Apple AirPort Express installed, stream music from your iPhone®, iPad®, Mac®, iTunes® or PC (requires AirFoil or like program for AirPlay) and surf the net from your internet device at the same time. The bottom line is the AirGo Outdoor is fun, sounds great and brings outdoor recreation to the next level.

access your music anywhere, including outdoors!

- Stream music from any AirPlay compatible device via an Apple AirPort Express Patent Pending
- Hotspot flexibility
- Incredible sound in the great outdoors
- A single large stereo speaker provides excellent sound in a wide sound stage

AirPort Express sold separately.

wireless freedom

The AirGo™ Outdoor Sound System is a portable amplifier speaker dock for an Apple® AirPort Express®. With the AirGo outdoor you can stream music from an AirPlay® compatible device via the Apple AirPort Express.

hotspot flexibility

Since the Apple AirPort Express also has the ability to simultaneously act as a Wi-Fi repeater, the AirGo can also offer a Wi-Fi hotspot while listening to music at the same time, virtually anywhere.

great sound in the great outdoors

As a high performance, quality outdoor sound system, the single large stereo speaker provides excellent sound quality and a wide sound stage. Place it on the deck near the house to cover the deck and backyard while having a cookout. Put it on the driveway near the garage when washing the car. Place it on the ground near the front door during seasonal events to play music and sound effects of your choice to match the occasion!

BSK-1 & BTA-1 Bluetooth Receivers for Multiroom Systems

2460-533778 BSK-1
2460-533792 BSK-1e
2460-533785 BTA-1

The new BSK-1 C-Series Bluetooth Receiver permits Bluetooth enabled devices to stream content to C-Series systems for wireless audio. It is a remotely located Bluetooth receiver, optimized for ideal placement and range by the custom installer. For maximum flexibility it can be configured as either a system source or a local source.

The BSK-1 integrates with Russound C-Series multizone systems. System components communicate with each other via the Russound RNET protocol, and components are interconnected using standard CAT-5 cable.

The new BTA-1 A-BUS Bluetooth receiver permits Bluetooth enabled devices to stream content to A-BUS keypads for wireless local source audio in any room.

The BTA-1 A-BUS Bluetooth receiver integrates with Russound A-BUS multiroom systems, which are also interconnected using standard CAT-5 cable. The A-BUS Bluetooth receiver streams content to the local A-BUS keypad, so it serves as a local source within the room whose audio that particular keypad controls.

.

powerful scalable **intuitive**

The C-Series multiroom system offers advanced features that make enjoying your musical experience even easier. Party Mode allows you to control the music and volume in every room from one room using a shared source. Source Linking connects multiple rooms to the same source while allowing independent volume and on/off control. This allows you to have your music follow you throughout your home. Zone Linking provides control of multiple rooms by one or more keypads, perfect for open concept homes.

get connected

The C-Series System is designed for integration, with Home Theater triggers, routed and common IR outputs, 12VDC trigger outputs, an optional system wide paging capability for intercom and telephone systems, and an RS-232 port for connection to home integration systems. When combined with Russound's VM1 Video Matrix, the C-Series System allows you to share HD component video sources within any multiroom system room.

time to **play**

Featuring a system wide clock with alarm and sleep timer functions for individual rooms, the C-Series System can provide the time, wake you to music, and help you delay your day, all with your favorite music.

affordable excellence

Share your music anywhere in your home, at the touch of a button. Engineered for elegance and flexibility, the CA4 multizone controller amplifier makes enjoying your music throughout your home an affordable luxury.

For system control, the CA4-KP keypad lets you select between four sources and adjust bass, treble and loudness. It also provides selection for source grouping, all on, all off, and party mode. The keypad features green backlighting, and includes an IR receiver and IR confirmation through an LED status indicator.

For larger homes or individual rooms selected as zones, two CAS44s can be linked together for an eight zone system. Each zone can be supported by up to three keypads for convenience. Your home, your system – endless possibilities.

CA4 Multizone Controller

4 source/4 zone rack mount, source grouping, party mode, fixed and variable line outputs, 1-unit high, 4 zones at 30W/zone, rear RS-232 port, RJ-45 expander jack, 4 single emitters (845.1). Fixed and variable line output (Zone 4 only). Rack ears included.

simplicity advanced

Russound's A-K5L keypad delivers more power output through the use of a highly efficient Class D digital amplifier. The keypad lets you adjust bass, treble and loudness, as well as set paging and local source turn-on volume for complete sound control. It features an LCD panel to view the selected source and audio settings and supports selection of six sources. The A-K5L includes an IR receiver and IR confirmation through an LED status indicator.

system hubs and controllers

A-BUS hubs provide a flexible, compact solution for multiroom audio installations. Available in single source configurations for in-wall, surface, or structured wiring installations, a four-source surface mount unit, or a 6 source/8 room advanced controller, their modular design allows systems to be tailored to any home and application.

system expandability

From hubs and controllers to amplified keypads, an A-BUS system installs using CAT-5 cable and keypads fit into standard low voltage workboxes. Installation, whether in new construction or an existing home, is a snap. The modular design of A-BUS components makes future system expansion painless. Add additional A-BUS hubs or controllers to increase the number of system rooms.

local performance

To enhance your audio experience, the A-LC3 local input module provides a local source input to an A-BUS zone. Listen to your iPod or enjoy sound from your TV through your A-BUS system speakers. It includes an IR emitter output for remote control of local sources. The BTA-1 provides wireless local source capabilities from any A2DP Bluetooth enabled audio source.

be resourceful

Digital music, Internet radio and iTunes are all available through Russound's Smart Sources. Our Digital Media Streamer and iBridge Dock both increase the accessibility to digital music available on iPods® local network devices or the internet available for listening through though our multiroom audio systems.

stay connected

Russound Smart Sources deliver metadata about the song, station, artist, album, or playlist of what's being played to specific Russound keypads and touch-screens, allowing you to check out the name of the artist you liked on your favorite internet radio station or see what playlist your children are listening to.

navigate your favorites

Russound Smart Sources make it easy to select your favorite stations, albums, artists or genres from your system keypads and touch-screens. Click or scroll through your sources and select anything you want to hear wherever you want to hear it.

AirPlay

As an Apple® Certified AirPlay® accessory, audio content can be sent to the DMS-3.1 from computers using iTunes®, iPad®, iPhone® and iPod touch®.

Acclaim® 7 Series

Optimized for multiroom and home theater applications, the Acclaim 7 Series features high-end materials, asymmetrical crossovers, and advanced features to present improved off-axis listening over conventional architectural speakers.

In-ceiling models feature Russound's Twist & Tilt™ technology, which allows the driver to be tilted 15° to focus output. In-wall and LCR models employ the innovative Iso-Mount™ chassis design, which uses an isolation gasket to reduce vibration transmission for increased clarity.

When performance and clarity are paramount, Russound's Acclaim 7 Series deliver enhanced power handling and greater efficiency for superb sound.

Flexbox Back Boxes

Flexbox speaker back boxes reduce background noise, provide a moisture barrier, diffuse distortion and improve sound quality. The flexible construction allows for easy installation in retrofit or new construction settings. Both models are flame retardant and meet ASTM E119 and UL 263/ NFPA 251 (1-hour) and ASTM E84/NFPA 70 standards.

power for your music

Audio amplifiers are the muscle behind every home music system. Russound puts great pride and effort into building stereo and multizone amplifiers that supply years of problem-free service.

Russound engineers embarked on designing our amplifiers to meet the demands of multizone audio systems: seamless integration, bulletproof reliability and astonishing fidelity. Built to complement an extensive array of audio systems, these versatile products deliver outstanding performance under the most demanding conditions.

R-Series power amplifiers

The R-Series amplifiers feature an elegantly understated industrial design. Their standard-width, modular-height designs look great in system shelving or built-in units, with rack mount conversion hardware for seamless rack integration.

Russound's R-Series amplifiers employ a robust circuit design for stability under demanding loads. All models feature auto signal-sensing inputs and bridgeable channel pairs for increased power output and flexibility of application. All amplifier channels feature independent gain controls for precise level matching and dual speaker outputs for convenience.

X-Series power amplifiers

The X-Series amplifiers are dual-source capable and are built to support installations using multiple speakers and volume controls. They are also well-suited for two-channel applications where higher power is needed, such as outdoor zones or large open interior spaces.

Russound's X-Series line of two-channel stereo amplifiers delivers performance and features in a flexible package. Featuring signal-sensing inputs, front mounted volume and balance controls, bridgeable outputs, and A/B speaker switching, the X-Series makes dual source amplification easy and affordable.

Signal sensing inputs allow the X-Series amplifiers to easily integrate with multizone audio systems and home theater components, or wherever local source amplification is being added to an existing system. In addition to front mounted volume knobs, all X-Series models can be used with impedance matching volume controls to power multiple pairs of speakers, or numerous zones.

D250LS 2-Channel Digital Amplifier

Auto-sensing enables localized speaker override for a connected peripheral, such as a TV or PC. The bridgeable power setting combines channel power for 125W into a single 8-ohm load, rated 50W/channel RMS at 8 ohms. 1U 1/2 rack chassis has three mounting options.

R850MC 4 Zone/8 Channel Multiroom Amplifier

Protection circuitry provides safety and reliability under heavy use. Amplifies up to four stereo line-level sources. Zones have dedicated line level inputs or can share a source via the bus input. Separate gain controls for each zone to preset room sound levels. Zone output can be switched to stereo or bridge mono output. In bridged mode, a zone's left and right channels are combined for a higher-power mono output, ideal for large rooms or outdoor listening areas. A+B speaker output in 4 ohm mode. Rack ears included. 50W/channel RMS at 8 ohms x 8.

Dimensions: 17" W x 16.5" D x 5.875" H (43 x 42 x 15 cm)

Russound wrote the book on impedance-matching volume controls and is widely regarded as the industry leader in auto-former technology. All Russound volume controls feature a superior auto-former design with impedance matching to provide excellent frequency response and maximum power transfer. With our volume controls, you get the highest possible performance, reliability and longevity.

the music lover's intercom

A natural extension of Russound's audio systems, ComPoint is a complete intercom solution that integrates with virtually any multiroom home audio system.

ComPoint is a true intercom system, providing point-to-point (zone-to-zone) communications as well as global paging from any keypad. With ComPoint, you can enjoy the benefits of multiroom audio and the convenience of intercom communications, all easily integrated together.

Instead of producing tinny sounds from an embedded intercom speaker, ComPoint can take advantage of existing in-wall or in-ceiling speakers that are part of a multiroom audio system, so you don't have to sacrifice sound quality for home communications and security.

Additional features that make ComPoint highly desirable are selectable doorbell chimes and "do not disturb" and "listen" mode features. For added convenience, you can respond to messages hands-free with point-to-point intercom, giving you the freedom to do other things and still converse using ComPoint.
